

FAR-INFRARED HEATING
MANUFACTURER
“Energy Efficient Heating”

Frameless Infrared
Heated Mirror

The Frameless Infrared Mirror panel combines practical heating with a functional mirror surface, making it ideal for bathrooms, hallways, dressing rooms. When activated, the panel emits infrared heat that warms the room naturally while keeping the mirror surface completely fog-free. When switched off, it functions as a sleek, modern mirror with a clean frameless edge. Its reflective surface allows the heater to blend seamlessly into any décor, providing warmth without occupying additional wall space. The infrared technology ensures efficient, even heating that reduces moisture buildup and enhances comfort in colder areas. This dual-purpose design makes it a smart solution for environments where space is limited or where discreet heating is preferred.

FRAMELESS INFRARED HEATED MIRROR PANELS

IP65 Rated
Waterproof design perfect for bathrooms and wet areas

Anti-Misting
Unique anti-misting properties keep the mirror clear
